

Asus chromebook battery light solid white

Why is my Chromebook battery light flashing white?

Good luck! If your Chromebook battery light is flashing white, this can mean one of two things: either the battery is in Shipping Mode or in a deep discharge state. Either way, there's not enough battery charge to power your laptop. Connect the power cable, wait for 30 to 45 minutes for the battery to charge, and then turn on your Chromebook.

Why is my Chromebook charging light blinking?

So, if there's an issue with your battery or it's not functioning as intended, you might encounter a charging light blinking issue. Since the battery is also directly related to charging, the white could keep flashing on your Chromebook even when there's a charging issue. Don't worry, though, as we have included potential fixes for the problem. 1.

Why is my Asus battery blinking white?

This is a warning that the battery is faulty, and you should stop using it and contact ASUS for support. It is important to note that the ASUS battery indicator blinking white does not always mean that there is a problem. If the battery is low or charging, the white blinking light is a normal occurrence.

How do I know if my Chromebook battery is bad?

Wait for 30 seconds, re-insert the battery, and turn on your laptop. Check the results. Of course, this is only applicable if your Chromebook has a removable cell. If the battery LED is still flashing white, this may indicate your battery is faulty. You may need to replace it. But first, check your battery health stats just to be sure.

Why is my Chromebook battery still in shipping mode?

Note: When a new Chromebook is used for the first time, the battery is still in shipping mode. To resolve this issue, turn off the Chromebook and plug in the AC adapter and turn on the Chromebook again. Note: The AC adapter may be different based on different models, please refer to the User Manuals.

How do I know if my Asus battery is low?

If the battery is low, the ASUS battery indicator will blink white once every second. This is a warning that the battery is about to die, and you should plug it in as soon as possible. If the battery is charging, the ASUS battery indicator will blink white twice every second.

Now it won't turn on - with the original charger plugged in, the indicator light is solid white - not blinking or alternating colors, and when I hit the power button absolutely nothing happens.
