

What is a solar battery charger?

A solar battery charger allows you to harness the energy of the sun to keep your battery charged. Solar chargers are also a great way to maintain batteries in vehicles that aren't used often. Since they don't need a plug-in power source, they can be used nearly anywhere. This makes them perfect for motorcycles, ATV's, and marine vehicles.

Can a solar panel charge a 12V battery?

It can be used for cars, 4WD's, trucks, motorcycle, marine, boats, farm equipment or any application where a 12V battery is used. The high efficient solar panel allows to absorb a wider spectrum of sunlight, as long as there is sufficient sunlight available, the charger will generate an electrical current to trickle charge the battery.

How does a solar charger work?

The solar charger converts light energy from the sun into 12 volt DC electricity which is then transported to the rechargeable batteries through lead wire and connector of choice, replace the self-discharge of a battery in storage, so that the battery wouldn't "go dead";.

Why do you need a solar battery charger?

Solar energy is a clean and efficient way to run devices in your home or your vehicle. A solar battery charger allows you to harness the energy of the sun to keep your battery charged. Solar chargers are also a great way to maintain batteries in vehicles that aren't used often.

Do solar battery chargers have overcharge protection?

Modern solar battery chargers are also equipped with overcharge protection. This can help you keep from ruining an unattended battery. O'Reilly Auto Parts carries solar battery charger options for most applications. Make sure your vehicle is charged and ready to go when you are.

Does O'Reilly Auto Parts sell solar battery chargers?
