

How do I charge my aegis solo?

The Aegis Solo is powered by (1) high amp 18650 battery (sold separately) and may be charged via the micro USB charging port which may be sealed tight with the silicone plug. The Geekvape Cerberus Sub-Ohm Tank features new Aero Mesh atomizer heads designed to produce incredible amounts of flavor and vapor.

How much power can the Aegis Solo handle?

The Aegis Solo is powered by a single 18650 battery and can handle up to 100W in Power Mode (20W more than the Aegis Mini). It also offers Temperature Control Mode from 200-600°F. It comes with TC support for typical materials (SS, Ni200 & Ti) and the option of TCR. Pretty standard but it does have a full set of modes.

What is the difference between aegis solo & aegis mini?

The Aegis Solo and Aegis Mini have some key differences despite their similar appearances. The Aegis Solo is smaller and lighter than the Aegis Mini due to its use of an 18650 battery instead of the 2200mAh built-in battery on the Aegis Mini. The Aegis Solo also has a maximum output of 100W compared to the Aegis Mini's maximum output of 80W.

What battery does the Aegis use?

The Aegis is powered by a 18650 battery, specifically the Golisi 4300 mAh 35 A.

Does the Aegis Mini have a battery bay?

The Aegis Mini does not have a battery bay. Instead, it has several battery ventilation holes and a USB port. The USB port is used for charging the 2200mAh battery and installing any potential firmware updates.

How many buttons does the Aegis Solo have?

The Aegis Solo has three buttons: one diamond shaped firing button and two connected adjustment buttons. The firing button is comfortable to fire with either your thumb or your index finger depending on how you hold the mod. It's a nice size and has a good clickiness to it.
