

What are solar powered roof fans?

Solar Powered Roof Fans are a simple and environmentally sensible solution that can protect your home, roof and even save you money. We specialise in commercial, residential and industrial refrigeration and air conditioning, offering Turnkey Solutions for your business.

Does a Remington solar attic fan run off a solar panel?

Normally, your Remington Solar attic fan runs directly off the solar panel. When the sun goes down, your fan would stop. With the Hybrid Power Adapter, if your attic is above 80 degrees Fahrenheit after dark, then the "smart sensor" will draw from your house power and keep the fan running until the attic cools down. Sale! Sale!
