

What is a solar laptop charger?

A solar laptop charger isn't typically something you can carry in your purse. Most solar chargers have 60W to 100W panels, so the voltage gets high enough to charge your computer. Most panels receive testing under laboratory conditions, so they'll never reach their peak wattage when you have them out in the real world.

Is a solar laptop charger a good choice?

Value for Money: 5/5 Considering its versatility, this solar charger is a good choice for laptops, other devices, and your car. A solar laptop charger isn't typically something you can carry in your purse. Most solar chargers have 60W to 100W panels, so the voltage gets high enough to charge your computer.

It can fold up to a compact 6.3x 11.1x 1.06 package that weighs just 17.3 ounces. You can also connect several panels to collect more energy.

Which solar charger is right for You?

If you don't need much power, the Voltaic Systems Arc 20-Watt Portable Solar Chargers could be right for you. The solar panels take about seven hours to fill the power bank, and the power bank charges a laptop once. That means you can't solely rely on it if you have to work for a long time.

Can a solar panel charge a battery?

These chargers are usually designed to be used more like a portable battery pack and less like a solar panel because the solar panel often isn't big enough to reliably generate a lot of power from the sun. The panel will work in a pinch, but it can be slow to charge the integrated battery.
