When budget constraints are a concern, FoxESS emerges as the best solar battery option. With distributor prices getting close to £200 per kWh storage capacity, they are the most affordable battery system available in the UK market at the time of writing. Despite its affordability, FoxESS does not compromise on quality or performance.

How much does a solar battery cost in the UK?

High upfront cost: In the UK, solar batteries can range from £2,500 - £10,000+ for a 6 - 14kW battery and about £8,000 - £9,500 for a 4kW battery for the average home. This makes them unaffordable for many homeowners with limited financial resources. Limited lifespan: Solar batteries tend to have a shorter lifespan compared to solar panels.

What are the best batteries for a solar-plus-battery system?

Here are the key specs of our top batteries: A solar-plus-battery system can slash your energy bills. You'll get the biggest saving if your battery automatically knows when to store and use solar energy, how much to store, and when to utilise off-peak electricity instead. Duracell's Dura5 battery is brilliant at doing this.
