

Can you replace a solar watch battery?

You can replace a solar watch battery, but chances are you will not need to for years and years. Regular maintenance, such as cleaning the dirt and sweat off the watch's body, will help prolong the battery's span. Solar watches use sunlight to generate the electrical energy needed by the watch to keep ticking.

Do solar-powered watches need batteries?

A solar-powered watch needs to have a battery to store the electrical energy that has been converted from light by the solar cells. This battery can be either a rechargeable or non-rechargeable battery such as a lithium-ion, nickel metal hydride, or alkaline. Some manufacturers, like Citizen, claim their solar watches don't use batteries.

Do Eco-Drive solar watches need to be replaced?

An Eco-Drive solar watch uses a specific type of rechargeable battery called a secondary battery, which may eventually need replacement as it ages. Remember, if you're not comfortable doing battery replacement yourself, consider taking your watch to a professional. You tinker with your watch's heart after all- you want to handle it with care.

Should you buy a solar watch?

Low prices encompass the short-term benefits while the sheer longevity of the battery and watch offers all of the benefits of an affordable, long-term value. Most solar watches have replaceable batteries, but the odds of having to get the battery changed out are very low.

How do solar watch batteries work?

The battery of solar-powered watches is charged through solar light exposure. The main difference between quartz watch batteries and solar watch batteries is in the source of their energy...but there are a few others: Generally, a standard quartz watch battery will run for two to three years before needing replacement.

What kind of batteries do solar watches use?

Solar watches use ultra-light rechargeable batteries. These are usually either lithium-ion or nickel-metal hydride, depending on the model of the watch. Lithium-ion batteries tend to be more expensive than nickel-metal hydride options and provide a longer battery life.
