

What does a red light on a charger mean?

A solid red light on a charger usually indicates that charging is in progress. If you have a smart charger, it may also mean that the battery is being analyzed before charging. During this time, the charger will check the battery's voltage, internal resistance, and temperature to determine the optimal charging voltage and current.

What should I do if my canon battery doesn't charge?

If any of the following occurs, remove the battery from the charger and consult your dealer or nearest Canon Service Center: All the Charge level lamps blink in green, all the Calibration (Discharge) status indicator lamps blink in red, or the indicators blink alternately in red and green (including the <CAL/CHARGE> lamp).

Why is my Canon camera not charging?

If the problem persists, take the camera to the nearest Canon Service Center. The charger's lamp does not blink. For safety, hot or cold batteries inserted in the charger are not charged, and the lamp remains off. In this case, let the battery adjust to the ambient temperature before attempting to charge it again.

Can I charge a canon lp-e6n battery with a battery charger?

Batteries cannot be charged with the battery charger. If the battery's remaining capacity () is 94% or higher, the battery will not be charged. Do not use any battery packs other than a genuine Canon Battery Pack LP-E6NH /LP-E6N /LP-E6. In case of charging or charger issues, see Charging the Battery. The charger's lamp blinks at high speed.

What does a red light on a battery mean?

In some cases, the red light may be accompanied by a flashing green light, which indicates that the battery is being conditioned or desulfated. This process helps break down any sulfate crystals that may have formed on the battery plates, which can impact its performance. What Does a Solid Red Light Mean on a Charger?

Can You charge a canon lp-e17 battery with a battery charger?

Batteries cannot be charged with the battery charger. Do not use any battery packs other than a genuine Canon Battery Pack LP-E17. In case of charging or charger issues, see Charging the Battery. The battery charger lamp is blinking.

In this case, unplug the power cord, reattach the battery, and wait a few minutes before plugging it in again. If the problem persists, take the camera to the nearest Canon Service Center.
