

How do you replace a battery on a Logitech keyboard?

Use any micro-USB cable. Plug the small end into the back of the device, then plug the other end into the charger or your computer. Some Logitech keyboard models, like the K800, use AA or AAA batteries. Remove the plate on the bottom to replace the batteries.

Does Logitech make a solar keyboard?

Logitech does make a solar keyboard, the Logitech Wireless Solar Keyboard K760. It works seamlessly with Mac, iPhone, and iPad. Logitech one-ups Apple with this solar-powered keyboard, which is the successor to Logitech's first solar keyboard, the K750, which earned a CNET Editors' Choice.

Do I need to take the keyboard apart to replace battery?

If you just want to replace the battery, you do not have to take the keyboard apart. There are several online instructions on how to remove the battery tray to replace the battery. But if you really want to disassemble the keyboard, you have come to the right place. I disassembled mine because I spilled alcohol on it and it stopped working.

How do you remove a battery tray from a keyboard?

Insert the flat end of a spudger into the gap between the battery tray and the top surface of the keyboard. Pivot the spudger down, towards the top of the keyboard, to begin to pry the tray out of its cavity. Use the flat end of the spudger to push the battery tray out and away from the keyboard.
