

# Collapsible solar panel container project ROI in Israel

Can a solar power plant be installed on a roof in Israel?

In order to meet Israel's goal of increasing the production rate of green energy to 30% within a decade, the State is promoting legislation that allows owners of private homes and commercial buildings to set up a solar power plant on the roof.

What is collapsible solar container?

Collapsible solar Container hit the headlines at recent trade fairs with the latest generation of portable solar technology combining standard shipping containers and collapsible solar panels for rapid deployment, end-to-end scenario flexibility, and intelligent management systems.

What is a foldable solar container?

Foldable solar containers merge two mature technologies: lightweight foldable solar panels and ISO shipping containers. The systems, CDS Solar states, are standard containers with inverters, controllers, batteries, and hinged panel arrays built into them, which open while in use and fold up into a compact form to ship.

Are solar panels a good investment?

Between the annual return and tax exemptions, solar panels can bring owners a yearly ROI of more than 10%. However, at the moment, those who own private homes and office buildings are most likely to benefit from this unique investment route, while it remains unprofitable for those who own apartments in shared buildings.

It was built by the KKL-JNF and launched in November 2022. The Hoshen project is the first in Israel to combine floating solar panels and storage. The efficient technology of ...
