## Cost of solar battery victoria

How much does a solar battery cost in Australia?

In 2025, the solar battery cost for Australian households starts from \$4,500, with larger systems exceeding \$12,000. This variation depends on battery size, brand, and whether it's installed alongside solar panels or retrofitted into an existing system. There are two key rebates that can help reduce the cost significantly:

Does Victorian have a solar battery rebate?

While the state's solar battery rebate (a direct cash rebate) has ended, it has been replaced with a generous interest-free loan to reduce your upfront costs. Eligible Victorian homeowners can access interest-free loans of up to \$8,800 for installing a home battery system, with the loan repaid over four years.

How much does a solar battery cost?

Thanks to falling prices and the federal battery rebate, thousands of households can now expect payback within the warranty period, particularly if they use a lot of power at night or join a Virtual Power Plant. In summary: Price Range: Popular solar batteries have an installed cost between \$8,000 and \$13,000 including the federal rebate.

Does Victoria offer a home battery rebate?

Victoria's primary support for home battery installations is delivered through the Solar Homes Program run by Solar Victoria. While the state's solar battery rebate (a direct cash rebate) has ended, it has been replaced with a generous interest-free loan to reduce your upfront costs.
