

What is a Garmin Fenix 7 Sapphire solar?

The Garmin Fenix 7 Sapphire Solar is the brand's flagship solar-enhanced GPS multisport smartwatch, succeeding the Garmin Fenix 6 with improved battery life, new training features and a new touchscreen. The Fenix 7 boasts a battery life that will last weeks thanks to its solar harvesting capability.

How long does a Fenix 7 battery last?

The Fenix 7 boasts a battery life that will last weeks thanks to its solar harvesting capability. It comes loaded with maps and has activity profiles for different sports.

How long does a Garmin Fenix solar battery last?

The battery saver mode increases that figure to 173 hours with solar. This shows a marked increase in battery life over the Garmin Fenix 6 Pro Solar, which features up to 40 hours in GPS mode and 16 days in smartwatch mode. The caveat here is these claimed figures require three hours of exposure to sunlight a day in 50,000 lux conditions.

How long does a Garmin Fenix 7 last?

The watch is water-resistant to 100m. This Fenix 7 comes with Garmin's solar charging, which helps boost the battery life of the watch to up to 73 hours in GPS mode or 22 days in smartwatch mode. The battery saver mode increases that figure to 173 hours with solar.

How long does a Fenix 7 Pro last?

And the Fenix's "Expedition Mode" is a great feature for extended wilderness use--by recording at intervals and disabling sensors and accessories, the watch can last up to 40 days without a charge. On top of that, the Fenix 7 Pro I tested has a built-in solar panel, meaning exposure to sunlight can boost battery life to 14 days in smartwatch mode.

Does the Garmin Fenix 7 have solar harvesting?

The Fenix 7 has a 260x260 pixel resolution transreflective colour LED display, which means it's clear and easy to read in direct sunlight. The display has a backlight for use in low light. This is the first time you have been able to buy Garmin's Fenix watch with solar harvesting and the Sapphire reinforced screen.
