

How long does a Garmin Instinct 2 solar last?

The Garmin Instinct 2 Solar is a standout option for anyone needing a watch to last for days at a time. With a stated GPS battery life of 30 hours, it packs more than enough battery life for most adventures. The biggest feature of the Instinct 2 Solar's battery life is its ability to charge through the watch face when the sun is out.

Does Garmin Instinct 2 have a better battery life?

In GPS mode, the battery life has almost doubled compared to the standard (non-solar) Instinct watches. The increases in battery life were less significant for the Instinct 2 solar models but still a notable improvement. Should I get the Garmin Instinct 2 Standard or Solar?

Should you buy a Garmin Instinct 2 solar?

If durability and battery life are your main concerns, we cannot recommend the Garmin Instinct 2 Solar enough. While lacking some of the more premium features found on the highest-end watches, we appreciate the simplicity of this design, both visually and internally. This watch is rugged and charges via the sun, so it can pretty much last forever.

How long does the Instinct 2 battery last?

With a claimed 30 hours in standard GPS mode, the Instinct 2 does not have the battery life of the high-end models that boast 100+ hours on a single charge while using GPS. Instead, the Instinct shines for those users not planning on epic GPS recording activities where conditions are variable.

Does Garmin Instinct 2 solar fit your wrist?

Consequently the Instinct 2 Solar fits the wrist comfortably (Garmin says it's suitable for wrist circumferences of 135-230mm) and remains slip-free during running, even at top speed. The Instinct 2 Solar has pretty solid battery life, particularly considering the price point.
