

Government subsidy for container solar mounting in Singapore

Are there subsidies for solar panels in Singapore?

In Singapore, there are no direct subsidies for residential solar panel installation. However, homeowners and businesses can still monetise excess solar energy through sell-back schemes that allow them to export unused electricity to the national grid. These are often mislabelled as "net metering," but Singapore does not use a net metering model.

How much support do solar panels get in Singapore?

The level of support you can receive depends on the Green Mark certification level and the carbon emissions reduction achieved through energy improvements. In Singapore, there are no direct subsidies for residential solar panel installation.

Does the government provide grants or subsidies for solar energy?

The cost of solar energy is now generally cheaper than the retail electricity price and regulated tariff. Hence, the Government does not provide grants or subsidies to further incentivize the adoption of solar energy. For energy efficiency grants, you may find out more about the Building Retrofit Energy Efficiency Financing (BREEF) scheme.

Does Singapore offer cash grants for solar panels?

Unlike some countries that offer cash rebates or tax credits directly to homeowners for installing solar panels, Singapore does not currently provide individual cash grants for private residential installations.

Is Singapore staying behind in promoting solar energy adoption?

As the world accelerates its transition toward clean energy, Singapore is not staying behind. In fact, the government has implemented strong initiatives to promote solar energy adoption among households, businesses, and public agencies.

Are solar panels a good investment in Singapore?

In Singapore, solar owners can also benefit from the sale of Renewable Energy Certificates (RECs), providing additional subsidies. RECs are tradable assets representing green electricity generated from renewable sources, allowing solar energy producers in Singapore to derive value from their solar panels.
