

Government subsidy for containerized renewable power in Guernsey

Will Guernsey have a new energy policy in 2019?

The Energy Team are reviewing the current Energy Resource Plan which was published in 2011, with a view to bringing a new energy policy to the States of Guernsey in 2019.

What is the energy strategy for Guernsey?

The Electricity Strategy for Guernsey covers the period up to 2050. The Committee for the Environment & Infrastructure considered several different ways in which Guernsey could meet its future demand including solar, wind, tidal, additional interconnectors, energy storage and alternative fuels.

What is the energy transition in Guernsey?

In Guernsey, we currently rely on fossil-fuel based systems of energy production and consumption and operate a thermal power station. However, it is recognised that as part of the response to climate change, there is a need to transition to an energy mix with limited, if not zero carbon emissions. This is often referred to as the energy transition.

How can Guernsey support a vibrant economy?

Supporting a vibrant economy - A clean, reliable, and affordable energy supply is a fundamental economic enabler. Establishing an environment for the development of on-island (including offshore) renewables will support the diversification and vibrancy of Guernsey's economy.

How much will Guernsey's family allowance subsidy cost?

All children will also be eligible for a free annual dental check. The subsidies will cost the States of Guernsey about £1.5m a year, funded by £1.9m savings from the family allowance tax benefit, the proposal said. There will also be about £260,000 spent on education and "cultural enrichment" programmes for young children.

Why should Guernsey invest in offshore renewables?

Establishing an environment for the development of on-island (including offshore) renewables will support the diversification and vibrancy of Guernsey's economy. A shift to decarbonisation in Guernsey will be an essential reputational advantage to support the growth of the green finance sector.

The Guernsey Power Station is a 1,875 megawatt, natural gas fired energy generation facility that produces electricity roughly equivalent to serve the power needs of approximately 1.4 million homes.

Because the total subsidy cost had a significant impact on the carbon reduction of the Guangzhou Port container collection and distribution network under different subsidy policies, we conducted a sensitivity analysis ...
