

# Government subsidy for mobile pv generator in Poland

What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

Are photovoltaic subsidies open in Poland?

During today's press conference, Ministers of Environment and Energy - Henryk Kowalczyk and Krzysztof Tch&#243;rzewski - announced that the call for applications for subsidies for photovoltaic installations in Poland under the "My Electricity" programme is now open.

What is a photovoltaic subsidy?

The main objective of the programme is to increase the production of energy from photovoltaic micro-sources. The subsidy covers up to 50% of the costs of building a photovoltaic installation with the installed power ranging from 2 to 10 kW, up to 5000 PLN.

How much subsidy is available for solar installations?

The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage. Any solar installations connecting to the grid after Aug. 1 must be paired with electric storage facilities and/or heat storage facilities to be eligible. The installations can range from 2 kW to 20 kW in size.

What is a micro wind power plant subsidy?

The program provides for the installation of micro wind power plants with a capacity from 1 kW to 20 kW. The maximum subsidy is PLN 5,000 per 1 kW. Small wind turbines must meet environmental requirements, including a 30-meter height limit on structures. A significant increase in residential energy storage installations is expected in 2025.

Are subsidies available for energy storage facilities?

Subsidies are available for energy storage facilities, as long as they are integrated with the energy source being implemented as part of the investment. The program provides support covering up to 20% of eligible costs. The continuation of both programs is planned with a larger budget.

Step by step, we will obtain a subsidy from the My Electricity 6.0 program, which will improve the comfort of our lives and the well-being of the natural environment.

Applications for non-repayable subsidies for robotisation, artificial intelligence and process digitalisation projects in response to the call for proposals under the National Recovery and Resilience Plan may be
