News o BPVA o 01 December 2024 The European Commission has approved a EUR590 million (BGN 1.15 billion) Bulgarian scheme to support investments in electricity storage facilities to foster the transition towards a net-zero economy, in line with the Green Deal Industrial Plan.

How will the selected storage systems be distributed in Bulgaria?

The selected storage systems will be geographically distributed across Bulgaria and connected either to the national transmission grid or local distribution networks. All awarded projects must be operational by March 2026.

How much money will be distributed from Bulgaria's National Recovery & Resilience Plan?

Following the final approval from the European Commission, a total of BGN 140 million will be distributed from Bulgaria's National Recovery and Resilience Plan, with the remaining sum coming from additional state and private sector funding. As much as BGN 80 million will be distributed in the first funding round.

Why is the Ministry of energy launching a call for standalone energy storage units?

The Ministry of Energy acknowledged that it is issuing the public call for standalone energy storage units after a long delay. The main objective of the investment is to facilitate a significant increase in the share of wind and solar power in the energy mix and to guarantee the security and stability of the national electricity system.

This report provides an in-depth look at the market for distributed solar PV for both households and businesses (i.e. residential and commercial prosumers) in Bulgaria. Prosumers are ...

Bulgaria has greenlit 249 proposals for the installation of renewable energy and battery storage capacity worth a total of BGN 526 million (USD 293.1m/EUR 268.9m) to receive funding under the National Recovery and ...

Solar and wind power are intermittent - completely dependent on the weather. To provide balancing - achieve equilibrium with intraday shifts in electricity demand, the ...

Bulgarian households can apply for grants for photovoltaic systems and solar collectors for own consumption

## **Government subsidy for mobile solar container in Bulgaria**

until November 10. The government's program is worth EUR 123 million, of which EUR 40.8 million is ...

Renewable energy sources today contribute about 20% of gross energy consumption in the EU. The 2020 targets were set in the Renewable Energy Directive 2009/28/EC and reviewed with a new RED. To further reduce carbon ...

Bulgaria has launched the long-awaited tender for standalone energy storage systems in a bid to significantly increase the share of solar and wind in its electricity mix. The ...

The European Commission has approved a EUR590 million (BGN 1.15 billion) Bulgarian scheme to support investments in electricity storage facilities to foster the transition ...

Mobile solar power containers are designed to provide renewable energy solutions in remote locations, temporary worksites, disaster zones, or military operations. Their ...

Want the lowdown on Spain's EUR700M BESS Container Subsidy? Learn how to qualify, nail the application, and cash in--no pirate maps needed, just pro tips to bag EU's biggest storage grant!

The year 2025 brings significant updates to government subsidies for container home buyers, reflecting a growing commitment to affordable and sustainable housing solutions. These policy ...

Mobile solar container The Solar PV Container is a containerized solar power solution has been designed with the aim of combining solar electricity production and mobility to provide this electricity everywhere around the world.

In an era where energy resilience and sustainability are more critical than ever, the Mobile Solar Power Container is emerging as an intelligent solution that integrates mobility, ...

The Bulgarian Ministry of Energy is readying to launch a tender on September 2 and provide Capex support for the construction and commissioning of 3 GWh of standalone energy storage facilities ...

The Bulgarian government considers the latest battery storage tender as part of its larger efforts to increase the share of renewable energy generation, especially wind and solar, ...

The Punjab government will bear 100 percent cost of the solar system and installation. The project will cost 10 billion rupees. The households benefiting from electricity theft, meter tampering ...

Bulgaria has taken a major step forward in its renewable energy strategy with the inauguration of a 124 MW / 496.2 MWh battery energy storage system (BESS) in the north ...
