

Government subsidy for portable solar generator in Oman

What is a generating system in Oman?

A system enabling eligible consumers to purchase electricity directly from eligible generating companies, independent of the Oman Power and Water Procurement Company, and in compliance with applicable electricity wheeling regulations. The transmission network or the distribution network, or both, as the case may require.

What are the advantages of solar energy in Oman?

The ability to produce electricity of the grid is a major advantage of solar energy for people who live in the remote and rural areas of Oman. Electricity produced from diesel powered generators and the cost of installing power lines are often exorbitantly high in these areas and many have frequent power-cuts. 6.

Should energy funds invest in a 2/3 megawatt project in Oman?

However, energy funds have shown no interest in local projects lower than 2/3 megawatts, as the rate of return is lower and risk is higher in Oman.

Is Oman a good place to invest in solar?

Oman benefits from some of the highest solar radiation levels in the world and is well placed to take advantage of the transition to renewable energy. A pilot scheme to install roof top solar in the first 3,000 homes in Muscat is underway with a full roll out of the scheme expected by the end of 2020.

What is a Green Hydrogen strategy in Oman?

In October 2022, MEM unveiled a Green Hydrogen Strategy and announced the formation of Hydrogen Oman (Hydrom), a subsidiary of state-owned Energy Development Oman, to oversee development in the sector. Oman is targeting \$140 billion of investment in the green hydrogen industry and hopes to achieve production of 1 million tons per year by 2030.

Is the yearly subsidy for domestic consumers sustainable?

The yearly subsidy for domestic consumers is over 600 million OMR and is unsustainable under current budget constraints. Large scale Industrial and Commercial consumers had subsidies removed in 2018.
