

How much does a home battery cost?

One of the most popular home battery options is the Tesla Powerwall, a sleek lithium-ion battery that holds 13.5 kilowatt-hours (kWh) of energy. The Tesla Powerwall 3 costs about \$15,400 before incentives and taxes are considered. At \$1,140 per kWh of storage, the Powerwall is one of the most affordable home battery solutions available.

How much does a Tesla Powerwall battery cost?

Based on a secret-shopping quote we acquired on Tesla's website for a home near Austin, Texas, a single Tesla Powerwall 3 battery costs \$16,779. Installation costs vary depending on your installer, but our 2025 survey of 1,000 recent home solar customers revealed that the average price to install a Tesla Powerwall is \$7,466.

Why should you buy a Tesla home battery?

Tesla is known for its electric vehicles, but it also creates other renewable energy systems, including monocrystalline solar panels, solar inverters, and solar batteries. The Tesla home battery can help reduce your dependence on the traditional electricity grid and give you coverage for power outages.

Is a Tesla battery right for You?

Although it is not a prerequisite to owning a home solar panel system, the Tesla battery may be right for you if: You have solar panels. Once your solar panels have generated enough energy to power your home, your solar battery allows you to store any extra electricity.

Do you need a Tesla Powerwall battery?

A single Tesla Powerwall battery may be enough to keep your home operational during a power outage--or at least the necessities, such as the lights and outlets. To power larger appliances and store more excess solar energy, however, you'll likely need additional batteries.

How do I buy a Tesla Powerwall?

As of March 2023, you can now purchase a standalone Tesla Powerwall through the Powerwall Direct program. If you choose to buy a Powerwall directly from Tesla Solar, you can have it delivered to your home or your chosen installer.
