

Level-1 Technicians" Training for women on Solar PV Technology in Collaboration with VOCTEC, Arizona State University, USA. (A USAID funded project). Conducted Hands-On training for Trainers (University Faculties) on solar PV ...

For the 40 demonstration projects in Kenya, the Lifelink system consists of a submersible pump which is operated by PV panels. Safe water is pumped from a borehole into an overhead tank.

Financing in the solar sector in Nepal has primarily come through grants and special funds. Commercial financing options for rooftop solar are still underdeveloped, with long payback ...

Beyond the Fixed Array: Why Foldable PV Containers Are Different Traditional solar farms are ideal for large projects but have a couple of major drawbacks: speed and ...

Mobile solar containers application visuals. Solar arrays inside of a container are applicable in a number of ways. Constant improvements in PV technology make it a great, future-proof solution. Below you can find just a few examples of the ...

This makes solar PV the third largest source of electricity contributing nearly about 3% of the total grid connected electricity in Nepal and all the pipeline solar PV projects when completed contributes 5.03%, considering current ...

This article provides a comprehensive guide to energy efficiency monitoring for foldable photovoltaic (PV) containers, which are ideal for off-grid and mobile energy solutions. ...

The POSTED project aims to improve the enabling environment for disseminating solar technologies such as solar mini-grids, solar irrigation pumps and solar rooftops (on-grid and off ...

We recommend that to achieve net-zero emission targets, Nepal's policy framework should prioritize deployment of solar PV: ground-mounted PV for utility scale, rooftop PV for ...

The project has signed an agreement with Nepal Electricity Authority to supply its electricity to the Duhabi-based substation of the power utility. The company has been constructing a 5 km long transmission line to ...

Group for Rural Infrastructure Development Nepal, (GRID Nepal),) is a multi disciplinary, non-profit making, non political non governmental organization (NGO) equipped with young, dynamic and dedicated

professionals ...

The project has signed an agreement with Nepal Electricity Authority to supply its electricity to the Duhabi-based substation of the power utility. The company has been ...

OUR PROJECTS Feasibility studies of utility-scale solar PV projects We conducted feasibility studies of utility-scale solar PV projects in various locations of Nepal. Key stakeholders include ...

Mobile PV-Anlagen sind autark, flexibel und besonders umweltfreundlich. Dank einfacher Installation können sie nahezu überall genutzt werden. Ideal für temporäre Anwendungen auf ...

As the intention of the installation is to increase access to solar energy services for livelihood enhancement, it has been realized to assess whether these systems installed ...

The main objective of this Guideline is to provide information to the Developers, Investors, Promoter of Solar PV projects who are in the process of development or intending to develop ...
