

Mobile solar unit EPC service price in New Zealand

How much do solar panels cost in New Zealand?

A 3kW solar power system would need ten 300W solar panels at a rough cost of \$8000 - \$10,000 in New Zealand. Conversely, a 4kW solar power system would require fourteen 290W solar panels at a ballpark figure of \$10k - \$11k installed.

How are solar projects procured in New Zealand?

Solar projects are typically procured on the basis of an EPC contracting model (in large part due to the "bankability" of this model). However, EPC contracts are not common in the domestic construction industry - there is no market 'standard' form in New Zealand.

Are solar EPC contracts common in New Zealand?

However, EPC contracts are not common in the domestic construction industry - there is no market 'standard' form in New Zealand. Consequently, in New Zealand the solar EPC contracts are either based on the FIDIC suite, or bespoke agreements used by private developers in other jurisdictions.
