

# Portable solar power box project ROI in Australia

Is solar energy storage a good investment?

Solar energy storage can significantly improve your solar ROI with reduced energy costs and potential government incentives. Studies suggest payback periods for solar battery systems in Australia are becoming increasingly attractive, making the switch to renewable energy a financially sound decision.

What does a modbox solar container include?

A typical ModBox solar container includes battery storage, inverter setup, internal racking, cabling, ventilation, and secure access. We can also include external solar panel mounting or integrate with your existing array. Can I use a solar container to power other ModBox units? Absolutely.

What incentives are available for solar panels in Australia?

The Australian government offers several incentives to encourage solar panel adoption: Small-scale Renewable Energy Scheme (SRES): This scheme provides certificates for each kWh of electricity your solar system generates. You can sell these certificates to electricity retailers, reducing your payback period.

Why do you need a solar container?

Our solar containers are built tough to protect solar panels, batteries, and inverters from harsh weather and unauthorised access. We can include insulation, ventilation, cable management, and specialised layouts to suit your specific solar setup requirements.

**Off Grid Container** This is the ultimate portable power station - a 20 foot container decked out with full off grid power equipment. Includes a large Victron Quattro 10kVA inverter, 10kWh lithium ...
