

How much electricity does Mexico use in 2022?

According to Mexico's National Power System Development Program (Programa de Desarrollo del Sistema Eléctrico Nacional or PRODESEN), the electricity consumption of the National Electricity System was 333,662 GWh in 2022, which represented an annual increase of 3.4 percent.

How does Mexico regulate energy storage systems?

The Mexican government recently issued general guidance to regulate energy storage systems. These rules outline the process and rules for integrating storage systems with different types of facilities, including power plants, behind-the-meter installations, load centers and distributed generation projects.

What is the future of power generation equipment in Mexico?

The market for power generation equipment in Mexico is estimated to increase 1.05 percent from 2022-2023, while exports from the United States to Mexico are expected to increase 0.93 percent.

Why is energy demand increasing in Mexico?

Energy demand in Mexico is constantly evolving, driven by economic growth, the expansion of industrial activities and population growth. And to supply this, the country needs to solve challenges such as expanding generation capacity and modernizing electricity infrastructure to ensure a reliable and sustainable supply.

What opportunities are there in Mexico's electrical power industry?

Mexico's electrical power industry mainly offers opportunities for U.S. products, services, and technologies for energy efficiency, distributed generation, energy storage, small-scale renewable energy projects, and distribution networks. The U.S. Commercial Service Mexico is ready to assist you in exploring these opportunities in Mexico.

How is energy demand calculated in Mexico?

To calculate energy demand, the consumption of all end users within a system over a defined period must be summed, using hourly measurements to ensure accurate data. In Mexico, the National Energy Control Center (CENACE) is responsible for monitoring and reporting these values.
