

Retractable solar panel container EPC service price in Canada

How does solar EPC conduct business?

From employees to vendors to business partners, Solar EPC conducts business fairly, impartially and ethically. Our goal is to be our customers' preferred supplier into each successive project. To reach our goal we must deliver an excellent quality product, on time, every time.

Why do you need an EPC?

Our EPC will deliver the best LCOE, incredible performance and all in excellent quality, and help to ensure your project is delivered on time, on budget and with the high performance level.

What is a containerized movable solar system?

A Swiss start-up has created a containerized movable PV system that is designed to be easily relocated to allow the use of solar energy in locations where a fixed installation is not an option. The solution is based on a racking technology which can include two racks able to host up to 30 solar panels. The Triptic solar array. Image: PWR Station

How much does solar cost in BC?

British Columbia - Solar installations in BC cost around \$2.60 to \$3.27 per watt, with costs influenced by higher labour expenses but offset by provincial rebates and net metering programs.

What is a solar panels on shipping container?

It not only transports the PV equipment, but can also be deployed on site. It is based on a 10 - 40 foot shipping container. Efficient hydraulics help get the solar panels ready quickly. Due to its construction, our solar panels on shipping container offers unmatched flexibility and maneuverability.

How many solar panels can a racking system hold?

The solution is based on the company's Exorac Triptic racking technology which can include two racks able to host up to 30 solar panels. The system can be retracted, tilted and locked into the container, which the manufacturer says protects it from threats such as theft, vandalism or hurricanes.
