

The two leading energy exhibitions are joining hands to co-deliver an outstanding renewables and energy storage event at Dubai's World Trade Center in April 2026. With an expanded exhibition section dedicated to solar and energy ...

According to projections from the U.S. Energy Information Administration (EIA), utility-scale battery storage is expected to experience remarkable growth, prompted by the ...

The Energy Information Administration said cumulative solar installations are expected to double from 91 GW to 182 GW from the end of 2023 to the end of 2026. Meanwhile, battery energy storage capacity is expected to ...

Yes, the solar battery rebate 2026 is not just for homeowners. Many small and medium-sized businesses can qualify too, especially those that operate during peak electricity ...

(The RFP response due date is April 28, 2025.) The proposed date for the first operation is Q3 2026. #183; MLGW is seeking 100MW+/- of solar generation paired with 50MW+/- ...

The solar landscape of 2026 and beyond offers amazing opportunities to reduce energy costs, improve sustainability, and increase energy independence. Navigating these changes requires both technical knowledge ...

Developed to support solar + storage professionals doing or seeking business in the state, IESNA Texas will spotlight innovative solutions from national brands and offer a regionally ...

Yes, you may be able to claim the credit for qualified upgrades, such as adding new solar panels, battery storage, or expanding your system--as long as the additions are ...

The solar landscape of 2026 and beyond offers amazing opportunities to reduce energy costs, improve sustainability, and increase energy independence. Navigating these ...

The US Energy Information Administration (EIA) says cumulative solar installations are expected to double from 91 GW to 182 GW from the end of 2023 to the end of 2026. Meanwhile, battery energy ...

Battery storage capacity additions through 2026 are expected to outpace wind, small-scale solar and natural gas, according to the Energy Information Administration.

Battery enclosures at Manatee Energy Storage Center, hailed by FPL as the world's largest solar-charged

BESS when it went into operation in 2021. Photo by Doug Murray for FPL Florida's largest utility, Florida Power & ...

SolarEdge's Newest Residential Solar Battery Is a Big Step Up From Its Previous Model This new battery model is twice as powerful as its predecessor and adds flexible battery capacity options.

In this article, we'll explore the most significant battery developments poised to shape the EV market in 2026 and examine their far-reaching impact on consumers, manufacturers, and the environment.

Researchers are exploring the use of organic compounds and sustainable materials that can reduce the reliance on toxic chemicals in battery manufacturing, paving the way for greener ...

Solar power supplies most of the increase in generation in our forecast. We expect the electric power sector to add 26 gigawatts (GW) of new solar capacity in 2025 and ...
