

Solar container kit EPC service price in Malaysia

How much does solar panel installation cost in Malaysia?

The cost of solar panel installation for residential homes in Malaysia varies based on the system size, which takes into account the current electrical consumption, electricity supply, and available roof space. Generally, a typical home solar system may range from RM15,000 to RM45,000.

Who is Suncatcher Sdn Bhd?

Suncatcher Sdn. Bhd. is a registered PV service provider with the Sustainable Energy Development Authority (SEDA) Malaysia. We offer turnkey solutions for solar PV system ownership, focusing on reliability, safety, and quality. We take pride in our knowledge and experience in the electrical field and our responsiveness towards our customers.

Is solar a good alternative to conventional electricity production in Malaysia?

Solar in Malaysia turns out to be a great alternative to conventional electricity production. With 12 hours of daily sunlight exposure throughout the year, it's as good as any exposure you can get elsewhere on earth. Malaysia is also supportive of the move towards green energy.

What is included in a solar kit?

Our complete solar kits include high-efficiency solar panels, a smart hybrid inverter, and a long-lasting LiFePO4 battery - everything you need to go solar with peace of mind. Whether you're aiming to reduce electricity bills, gain energy independence, or back up your home during outages, Sunpal has a solar package that fits your needs.

What is included in a solar package?

All packages include professional installation and mobile monitoring for full control of your energy use. Sunpal, a Malaysian solar company founded in 2008, provides PV panels, batteries, inverters, and solar systems, focusing on sustainable, cost-effective energy solutions used in over 80 countries.
