

Solar panel mount for container EPC service price in India

What is solar EPC?

EPC stands for Engineering, Procurement, and Construction of a Solar System. While the term is mainly used in creating commercial projects, nowadays, the term is also used for end-to-end solar installation services for residential projects. In solar EPC, the solar company creates the design of your solar system based on your space and needs.

What is a solar EPC Company in India?

A Solar EPC company in India is responsible for the entire solar project lifecycle, from design and procurement to installation and commissioning. They ensure efficient implementation and compliance with regulatory requirements.

Which solar panel mounting structure designs are available in India?

Top-of-pole Mounted Racks: The top of the pole mount is designed in this manner, so that it can be installed safely and quickly. It also helps in supporting the mounting structure in a single-pole. On the top of the poles, the solar module is mounted securely. So, these are some solar panel mounting structure designs that are there in India.

How much does solar panel mounting cost in India?

In the smaller plants, the average cost of solar panel mounting structure price in India is up to 9% of the total project cost. However, the average cost of the solar panel mounting lies in between Rs. 3.60/WP to Rs 6/WP for 1MW of the solar panels of Rs. 40 million. The average cost for Rooftop solar panels is around Rs. 36.6 million/MW.

Do you use your own solar PV modules in your EPC projects?

We primarily use our own manufactured solar PV modules in our EPC projects. **Design & Engineering :** Through our in-house teams, we offer engineering solutions to our clients, with an aim to provide quality solar plants aimed at optimizing the life cycle cost of electricity.
