

Why is the red light on my Roomba flashing?

When the red light on your Roomba is flashing, it indicates that the robot is charging and the battery level is too low to power up. This can be fixed by allowing the Roomba to charge until the light turns solid or by replacing the battery if necessary.

What does a red light on a Roomba mean?

A solid red light usually indicates a low battery or a charging issue. If your Roomba has been sitting idle for a while, it might simply need to be charged. However, if it's been charging and still shows a solid red light, there may be a problem with the battery or the charging contacts.

What color is battery light on iRobot Roombas?

The battery light color on iRobot Roombas is different in each model. In general, in the 500-900 series green indicates a fully charged battery, red means low or no battery and flashing orange means it's charging.

What happens if my Roomba battery dips below 15%?

Trust us, it's a good thing there's no workaround. When your Roomba's battery dips below 15%, the red light switches off, making way for the usual charging indicators. Depending on the model, you'll see the light either go out, change to white, or begin to pulse white.

How do I know if my Roomba battery is charging?

When your Roomba's battery dips below 15%, the red light switches off, making way for the usual charging indicators. Depending on the model, you'll see the light either go out, change to white, or begin to pulse white. If your Roomba's battery is over 15%, checking if it's charging is straightforward for some models.

How do I fix a red light on my Roomba?

Reset the Roomba: Sometimes, a simple reset can fix charging issues. Press and hold the Clean button for about 10 seconds until the Roomba restarts. Then, check if the red light goes away. Replace the charger or battery if necessary: If the red light persists, there may be a problem with the charger or the battery.
